Exercise: Observing Your Habitat

Purpose: Use this exercise to record some more observations of your habitat.

1. A community in nature is made up of the plants and animals that live near each other in a habitat. Describe the community you have found in your habitat.

2. Describe the attributes of the physical environment in which your habitat exists.

3. Describe the condition of your habitat:
(eg Good, Degraded, Natural/Native, Damaged, etc)

4. Describe how events or actions have inversely affected your habitat?
(eg Flood, Fire, Drought, Human Impact, etc)

**You have just written information about the *ecosystem* in which your habitat exists!
