

## System Requirements

**Purpose:** To define the computer configurations on which Habitat Tracker© will install and run successfully.

The Habitat Tracker© Application is a Windows based software program. As such, it requires Microsoft Windows be installed as the Computer's operating system. Unfortunately, Habitat Tracker© will not run on Mac's or computers running other operating systems.

On Windows based computers, Habitat Tracker© has the following system requirements:

- Windows 2000 or later. (Windows 2000, ME, NT, XP)  
Dynamic Software does not support installation on Windows 95 or 98.  
Habitat Tracker© will not run on Windows 95.  
Habitat Tracker© will run on Windows 98, however occasionally there are issues due to the specific configuration of those computers.
- 200 megabytes of free disk space
- 300 megahertz or faster processor
- 64 megabytes or more of RAM

Hardware Accessories:

- Ink jet or Laser Printer for Worksheets and Reports

Optional:

- Color Printer for Trading Cards, Markers, Seed Packet Labels, and Bookmarks
- Sturdy Stock Paper (67 lb weight or higher)
- Printer Labels (2 x 4 inch for Seed Packet Labels)
- Printer Card Stock (Business card and Index card size, can use sturdy stock paper instead)
- Trading Card Sleeves (for Plant and Wildlife Trading Cards)\*
- Marker Holders\*
- Seed Packet Envelopes\*
- Craft Sticks (for Row Markers)
- Seed Starting Materials\*
- Laminator

\*Available through Dynamic Software

**Note:** In order to view .jpg files through Habitat Tracker©, even if they are viewable with other applications on the computer, Microsoft Office, or minimally Microsoft Word must be installed. Without these Microsoft Office products installed, Habitat Tracker© will view other image file types except .jpg files (such as .bmp files).

If you do not have Microsoft Office products on the classroom computers, please call Dynamic Software regarding this issue, and we will help you regarding resolution.
